

Testimony before the Energy & Technology Committee

In Support of
**SENATE BILL 450, AN ACT CONCERNING ENERGY
CONSERVATION AND RENEWABLE ENERGY**

Submitted by
Peter Stewart

March 20, 2012

I fully support this legislation to encourage efficient home oil heating in CT.

It helps to create jobs in the State, may mean that consumers will have more cash that may flow back into the economy, it's good for the environment and reduced dependence on oil ultimately improves National Security.

I hope that CT continues to be a leader in promoting efficient use of energy resources.
