Judiciary Committee

House Bill 5488

I am the grandmother of Treau Bemis, she was murdered by Craig Betancourt on September 16, 2007. Treau was only 27 months old when he drowned her in a bathtub. I feel that he should have gotten life, but they dropped the charge from murder to manslaughter in the first degree. Because of this, he is able to earn credits to get out early. I do not feel that when someone takes a life as he did; should be able to get any credits. He took a life of a beautiful baby girl, just because she was crying, and he got irritated.

We will never be able to see our Treau until it is our time for God to call us home. I fully agree with the House Bill #5488, please help us to keep these type of people away from our family's.
