Subject: S.B. 343
message: Senator Cassano,

I am writing this email to voice my opposition to S.B. 343. I believe this bill will silence the voices of the average citizen who have valid concerns in regards to the environment. I believe requiring an intervenor to post a bond for potential damages will undermine the average citizen's ability to voice their concerns because they don't have the money to post that bond. Section 52-568 of the CT General Statutes already discourages the bringing of civil actions without probable cause.

This bill seems to be protecting big business while silencing the average citizen by fear of financial retaliation.

Thank you for your consideration on this matter.
