Testimony of
Hospice Southeastern Connecticut
Before the Legislature's Public Health Committee
10:00 AM, Friday March 16, 2012
Room 1D, Legislative Office Building Hartford, Connecticut

My name is Gene Mazur . I am a Connecticut resident and a proud supporter of Hospice Southeastern Connecticut.

I am submitting testimony in support of House Bill 5499 (Raised) An Act Concerning Regulations Relating to Hospice Care .

Please support HB 5499 which requires the Department of Public Health to adopt the Inpatient Hospice Regulations 19a-122b-1 to 19a-122b-14.

These regulations are about the dying patients and families in every corner of Connecticut having access to the full range of hospice care services. These contemporized regulations preserve the hospital standard set in Connecticut 30 years ago and establish a regulatory environment that allows for other models of inpatient hospice care that suit their respective communities.

Patients and families in every corner of Connecticut deserve access to an inpatient hospice model that suits their communities.

Currently, the full continuum of hospice care is not readily accessible to all our state residents. This care includes care in the home, care in the hospital, care in a skilled nursing facility and care in a hospice residence or facility. Of the 5150 hospice providers in the US, one in five also operates an inpatient facility. CT has only 1 inpatient facility licensed under regulations from 35 years ago.

A Hospice Residence would provide a place for quality end of life care when home care, hospital care or skilled nursing home care are not appropriate or possible. The 12 private rooms would have access to the outside garden, accommodations for family to visit and stay overnight with their loved one. The Residence would provide a relaxed atmosphere

where you can find a cup of tea in the kitchen, sit in the great room to read, find a quiet place for reflection in the library, take time to find solace in the non-denominational chapel, gather with family in the dining room.

We need your support to help us provide this care to CT residents. Please support Department of Public Health in moving the regulations forward to the Regulations Review committee.

Thank you for taking the time to consider my testimony. Please feel free to contact me if you have any questions at 860-748-8947 or GMazur2@cox.net.
