*[culture]*

I had an experience since 1995 to now. The deaf people gather to meet and learn many issues a monthly. Like the cops came and learn the deaf cults and feedback. Senates came and lecture before vote. We learn the new techical and feedback monthly. I got many medicare program envelopes and feel overwhelm. I need to help from senior citizen agents and advice me to pick the right one. If the hearing people sit at audituem and one deaf person during the person lecture so I feel helpless without interpreter and difficult to ask the questions because the hearing people request faster. All deaf group gather and sign the questions and understanding and feedback better. And need the interpreters there. And help us to work Tax paperworks every year as we need. If the budget cuts so we feel lost.

Please keep to support DNEC.
