Retiree Health Care Cuts

Appropriation Committee,

This an outrage. Once again the teachers of Connecticut are being disrespected by members of the State Legislators and the Governor of this fine state.

How is it possible to neglect one of the states finest resources. The job is difficult enough without having to continually worry about the underfunding of the Retired Teachers Health Care Fund. It is still a costly proposition for teacher to maintain health care in retirement, why add to the misery?

I realize the Governor will be well taken care of in his retirement years as well as many of the legislators. Why continue to dump on Connecticut's Educators?

We need your help and support to set the course straight and properly fund the Retiree Health Care Fund.

Thank you for time and support.

Richard Vaughn
