Testimony of Robert Tod Bryant on HB 6350

I am the President of the Norwalk Preservation Trust. I am opposed to the inclusion of a nutrition program, even temporarily, into the Community Investment Act, which is intended for land use issues. This action would reduce funding to the programs it is meant to support. This measure would also set a dangerous precedent by opening the door to diluting and confusing the purpose of any act designed to fund specific initiatives. I urge you not to add this program to the Community Investment Act.
