Dear Members of the Appropriations Committee,

I am writing to ask for your continued support of the Connecticut Science Center, as proposed in the Governor's budget. Before i had become involved with the Connecticut Science Centers Robotic Program, i had no clue about what i was going to do as my career. I was confused between going to college to become a lawyer or a doctor. During my internship over the summer break, I have experienced many new things that have changed my perspective of my future. Being around the robots we were creating and the exhibits, it has occurred to me that the future really is coming fast, and that I actually do want to take part in the involvement of our future. So I am asking you guys as a future computer engineer, please continue your support of the Connecticut Science Center.

Sincerely,

Tayler Allen
