Subject: clean and renewable energy bill

Please support the HB 6650 clean and renewable energy bill. Every day the time grows closer to environmental disaster due to emissions from oil and coal. The cost to the consumer and to our country's welfare, in general, is reason enough to make a change toward more renewable energy. The sooner we are not dependent on oil from the countries with whom we have political concerns, the better will be our national security.

Thank you.
