Subject: Bill number HB6650

It has come to my attention that this bill would tax all home heating oil customers. I am against it. Why don't we focus on what we really need to spend and not raise taxes to fund what may not be necessary. Make it easier for businesses to start up and grow and hire more people. That's healthier for everyone.

And, by the way, please make sure that Smart Meters are not imposed on the population of Connecticut. They have been shown to be hazardous to at least 6% of the population (affecting their brains) and the potential monitoring by government is an intrusion into our privacy.

I appreciate your consideration of my opinions.

Thank you.
