

Please be aware of the mistake that is being made with regards to taking funds from the CIA fund and putting money in the Healthy foods Initiative. The Healthy foods funding needs to be in health and safety or in education. The land account is important for quality of life with land conservation, farmland preservation, and historic properties. Once the land is gone it is gone for ever. The towns need the money to help purchase properties. Education for healthy living is important but the funds for this should not be impacting the CIA funds. The CIA needs more funds rather than less. Please do not allow this fund to be eroded. The environment with its forests, etc are also a piece of healthy living for all.
