

Dear Sir or Madam,

I am surprised at the States readiness to clean up the disaster that was once our beloved Sunrise Resort. As a former employee of the resort and resident of East Haddam, I speak candidly when I say that what has been allowed to go on in the location is absolutely atrocious, and action should have been taken long ago to better preserve the area as best possible. It is an utter embarrassment, as a resident, to know that our very own State should care so little as to enable prolonged abuse of such a cherished and fond premises.

I am not surprised, however, at the states motives. I am absolutely disgusted at the thought of selling the property, knowing the intent. This property was sold to the State at a more than reasonable price to ensure that it remain open space, and be utilized to its fullest extent and avoid development and/or destruction. Not only has the State thus far not upheld their end of the bargain by allowing this property to be practically wholly demolished, but now they are inclined to use it for profit. I strongly believe that the State of Connecticut has an obligation to its residents to not only keep this property as open and public space, but to also maintain this land, keeping it safe for all to enjoy and able to thrive as the untouched slice of nature it is.

I am absolutely not in favor of the wording of HB 6539, pertaining to Sunrise Resort, which alludes to the possibility of the DEEP selling the property for any reason. And I assure you, as a lifelong resident of Connecticut, I will lose what little faith I have left in our State if this ill intentioned bill is allowed to pass.

Thank you.

An Angered Connecticut Resident
