

As a boater and a voter I am totally opposed to on-line boater and firearms training . The notion is preposterous with little real educational accountability . We can't do on-line driver education nor should that be available . All three , driving , boating and firearms use can be enjoyable , recreational and safe but all three can have deadly consequences with inadequate education and training and this can only be done adequately in course and formats that are in vivo . I trust the legislature will be wise enough to not let this bill pass . Respectfully , John Thomas
