

To whom it may concern,

- On line training is good for some things, but it's not good for "drivers" - it can't be good for "boaters" or training for hunters
- You can't ask a question of a computer
- You can learn from other students while you are at home taking the course on your laptop
- You learn about boating from boaters - this is a cold computer, not a real person
- I had to work for my "diploma" - why should the new students have it really easy and not know as

much as I when boating

- How do you know that the person taking the test is really the person who took the course
- A computer can't show you how to dock a boat - or tell you what mistakes it made while it was learning
- A computer cannot properly teach weapons training and safety for hunters and especially for children.

This is an unsafe proposal which puts people at risk.

There are lots of things to learn about boating that are not in the book. If you are sitting at home with your

PC, you just can not "hear" what the other students are asking, and what the instructor is telling them. My teacher brought some "training aids" into the class - radios, ropes, charts ... How can students learning through a computer ever "see" what boating is about?

I STRONGLY oppose changing the regulations/laws regarding Boating Safety and Hunter Safety

training at this time.

Respectfully,

Peter Bisconti
