

Greetings,

I would like it known to the environment committee that I am in support of Sunday bow hunting on public and private land. My reasons are simple, as a member of the hunting community I spend considerable money in CT for my hunting supplies and to earn that money I work during the majority of legal hunting times, meaning Monday to Friday, that leaves me the opportunity to only hunt on Saturdays or I have to take time off from work. Sunday hunting will allow me and many like me to enjoy our sport and will most likely open this activity to more people.
