

I have been hunting since I was young and I see no negative aspect to bow hunting on Sundays in the small but great state of CT there is no noise disturbance and it offers an opportunity for young men and women and there moms or dads to get into the woods on there days off. Reconnecting with nature and each other VS being stuck inside playing video games or watching TV. I see this as an healthy and positive thing for our sportsmen in general and I see no real issues for non hunters but still respect the feelings of all voting taxpayers. Thank you for your work and good day. Sincerely Mike Milo
