

For the Environment Committee, concerning HR Bill # 6541 - hearing on Friday March 8, 2013

I know that your committee is considering changing the law to allow a short on-line computer course to take the place of classroom-based safe boating courses. As a jetski and boat owner i think is very dangerous and will cause lives. I few years ago i took the classroom course and the questions that other students ask and the captains sea stories really help me realize how much i was putting me and my family at risk. No computer will give u that knowledge. You wouldnt put a driving test online and the water is far more dagerious than the road. This is a really bad idea.

Please do not allow this new law to go into effect –
