

For the Environment Committee, concerning HR Bill #6541 - hearing on Friday, March 8, 2013

The idea of changing the law from in class to online is absurd. There is no substitute for having an actual real person instructing a class. The ability to have a conversation, ask questions and see/use equipment is crucial. This goes for both boating and hunting safety. If any Joe Shmoe can just turn on their computer and get certified (not to mention the cases of fraud) the boating and hunting worlds will become unsafe and that is no place I want my family.

Please do not allow this to happen now, or ever for that matter.

Thank you

John McGrath
