

For the Environmental Committee, concerning Bill #6541 - hearing on March 8, 2013

I strongly oppose changing the regulations/laws for Boating Safety and Hunter Safety.

Why on earth would you change these classes to computer training versus personal training? Don't you realize that hunter and boating safety is a serious safety concern for all. Just like driving a vehicle. You can not take drivers ed classes on line nor should you be able too. A car, just like a boat or a gun can be lethal. If you have someone who is reckless than lives can be lost.

Did you forget what just happened in Sandy Hook because of a gun? Our government systems are falling apart and are only concerned with collecting fees for licenses. I strongly oppose changing the regulations and laws on Bill #6541.

Thank you
Respectfully,
