

To the Environment Committee, concerning HR Bill#6541- hearing on Friday March 8, 2013:

I would hope that this bill for on-line education be reconsidered for the fact that this is truly **not** an educational tool. When it comes to “live” learning experience and knowing the safety and true live experiences of weapon and boating training the course should be face to face with specialty instructors who have had the wisdom and “know how” to guide those in learning.

This bill will only create problems because online learning does not have the heart and soul of knowing what is right and wrong! It’s just a program! Training comes from live experienced staff. Please do not allow this new law to go into effect...

Respectfully,

Roxanne Guzze, RSM
