

Written Testimony Concerning Governor's Bill 6360 AN ACT CONCERNING  
IMPLEMENTATION OF CONNECTICUT'S COMPREHENSIVE ENERGY STRATEGY

Regressive components of the bill:

1. relying on fossil based natural gas (including fracking - yikes!)
2. including "trash-to-energy" as clean - yikes!
3. preparing for more destructive & wasteful transmission from Canadian hydro - yikes!

Progressive components that should be emphasized in the bill:

1. Energy Efficiency - Yea!
2. Micro grids for local power assurance - Yea!
3. Fuel cells with solar produced hydrogen - Yea!
4. High-tech design small wind power installations - Yea!
5. Small hydro upgrades all over the state - Yea!
