Raised House Bill No. 6470, *AAC Concerning Clarity of Retail Electric Offering Terms*

Testimony of Levco Tech Inc.

My name is Edward Levene, I am Vice President of Levco Tech Inc. Levco is based in Norwalk Connecticut. In combination with Dominion Retail, Inc. we serve about 60,000 electric customers in Connecticut .

HB 6470

The purpose of this bill is apparently to provide more clarity to the advertisements or disclosures made by retail electric suppliers to consumers. We believe offers should be clear and term of the agreement should be easily identifiable by the consumer.

We believe these are the kind of issues that should be clarified. We would recommend that the bill language authorize the PURA to establish a stakeholder technical work group to thoroughly discuss the consumer concerns involved here so that suppliers can better understand the types of practical, modifications needed to their advertisements and disclosures to avoid any misunderstandings so as not to jeopardize the retail choice market.
