

Dear Mr Duff and committee members-

I am involved with a solar construction firm where REC prices are crucial to deals getting done. My understanding is that SB 1138 would help out large ventures such as those with Quebec Hydro at the expense of small DG deals that IN-STATE FIRMS rely on for their bread and butter, with the use of ZRECs

Maybe we should slow this thing down so it can get real scrutiny from firms like mine and others around the state.

Thanks,  
Sev Duvall
