

Senate Bill 843, An Act Concerning Revenue Items to Implement the Governor's Budget.

I am unable to be at the hearing today to discuss eliminating car taxes so I wanted to write this letter to convey my opinion.

The car tax helps to disburse the financial responsibility of our towns to all its residents not just those that own homes.

It takes money to run our towns. If you take away this source of revenue how will it be made up?

This will place an inappropriate burden on housing to make up the shortfall. This will make many decide not to purchase homes or push those that are struggling with their payment on their existing homes to throw up their hands and quit... letting their homes go into foreclosure and further bring down property values and stifle our economy even more.

A very concerned homeowner...
