

Housing Committee public hearing re proposed bill no. 6117

I am not opposed to affordable housing but I am opposed to how it is implemented. It is destructive to town character and the environment. I support the approach taken in bill 6117 that looks at town character through the lens of the historic district and at the environment through its addressing the smart growth principles of nodal development and conserving of natural resources. This is the approach that is needed to move forward in a constructive way with this needed resource, affordable housing.
