**Subject:** Testimony for HB-6656

Dear Committee,

I Ralph J DeStefano oppose HB-6656 ,I find this bill to be unconstitutional on the grounds that it is my god givin right to protect my family and i from criminals and this will also make it harder for me to even end up owning a firearm for protection on the grounds that i will not be able to afford it and i presume that this is about more revenue for the state. I feel that i'm taxed enough as it is, seeing i am only a blue collar worker i see myself leaving this state with all that is going on infringing on my rights and everything else all of you are just making it harder and harder to earn a living anymore and for a state i grew up in and love very much it is just getting way to difficult to even survive.

I suggest while your going to make everyone get insurance you will have to insure knives and baseball bats an even hands an feet for that matter seeing those have more deaths behind them than firearms so if your going to insure firearms you might as well get those as well i find all these new bills to be the result of emotional , knee-jerk reactions to what has happened and frankly are not going to do a damn thing to stop criminals from doing what they do and still see nothing going on with the true heart of the problem Mental Health.I also thought that the liability insurance for a renter or homeowner is already covered by that type of policy i'm just really getting fed up with no one listening and infringing on my rights and i'm certainly going to hold everyone accountable come voting time for anyone that violates my constitutional rights , remember you all swore an oath to get where you are today do not let me down.

Sincerely,

Ralph J DeStefano
