

Dear Insurance and Real Estate Committee,

I oppose H.B. 6656

Enforcing H.B. 6656 that requires purchasing insurance to buy a firearm is not going to deter violent crime because criminals are acquiring their weapons illegally.

Another problem with this law is that requiring insurance is unconstitutional because this would cause a burden on any citizen exercising his or her 2nd amendment right.

Our legal system is already filled to the max with many violent offenders in our state.

Now, our taxes will now be spent on prosecuting gun owners because of not having insurance?

How does this law make Connecticut any safer?

Thank you for your time

Brad Blessig
