

I stand in opposition to HB 6656.

The idea that requiring insurance would prevent "gun violence" is absolutely preposterous. I defy anyone to produce documentation that would support such an absurd premise. This proposed legislation is a perfect example of how the true agenda of the CT legislature, backed by Mr. Malloy, is not to prevent another "Sandy Hook," but rather to strip away the rights of Connecticut citizens to bear arms.

This bill is nothing but a punitive measure designed to render gun ownership financially unattainable. It does nothing to protect the public. It is merely a poorly disguised, blatant attempt to prevent as many Connecticut citizens as possible from being able to exercise their right to self-defense.

Our representatives have absolutely no right to place an exclusionary price tag on a basic natural Constitutionally guaranteed right. You are required to protect our rights, not create legislation that in essence removes them. Honor your oath. Reject this bill.
