Subject: H.B. 6656

Hello my name is Dylan Begin and I reside in Bristol, Ct and I am opposed to H.B. 6656. I'd like to take this time to thank you for having this hearing and giving myself an opportunity to express my concern over this issue as a working class individual and law abiding firearms owner. I'm opposed to these pieces of legislation for many reasons and one of them is. Criminals will not purchase this insurance for there illegally obtained firearms because then we would know that they had them. And a few other reasons are. Our right to own firearms are guaranteed under our federal and state constitution's respectively there are very few things guaranteed to us under the constitution, but also we have a right to property and we are not required to purchase homeowners insurance if we own the home outright and do not have a mortgage on the property. I hear an argument about cars and liability insurance but driving a vehicle is not a protected right. it is a privilege. And insurance companies can drop your coverage at anytime for any reason as they do for people on there homeowners who own pittbulls and Rottweilers. Now making this a requirement for firearms owners makes our constitutional rights are null and void and are now a privilege given to us by the government and a insurance company. Please dont infringe on our rights anymore then they already have been. I deserve and are guaranteed the right to protect myself and my 7 yr old son and 5 yr old daughter. Please dont take my ability to defend my family. Know I am also opposed to other pieces of legislation proposed but today is about insurance. If you would like me to answer any questions I would be more then happy to
