

3 minute testimony for Bill 6685-Shared Parenting
April 5, 2013

Hi, I'm Andrea Cota Eigner, from Cromwell, Ct. I am a Survivor of Corruption. I am a Mother of 3 boys who I currently have no contact with, because of family court tyranny which began in 2008. My ex-husband no longer wanted to pay child support and used my Religious Beliefs in God as an excuse to manipulate the already corrupt system. After 4 long years of battling the system, I recently filed a Federal lawsuit for Religious Discrimination (a Constitutional Violation), also for Alienation and Damages, upon those responsible for allowing this process to take place. I am awaiting a Federal Judges decision regarding the return home of my 12 year old son to me.

I support Bill 6685 regarding Shared Custody, and I especially support the section containing the sharing of Religious Development. The change I would like to see in the Bill would be one line added to the Title, and within the body of the Bill, referencing (Reinforcement) of Our Constitutional Rights, not only as American Citizens but also as citizens of Connecticut. We the People of the Constitution State need to set an example for the the rest of the Country. And another line to be added to the Title, and within the body of the Bill, would be that of holding the lawbreakers in the system accountable, from the date in which Our Constitution was written. What we really are asking for in this Bill is the Reinforcement of our Human Rights already given to us in the Constitution, in 1787. If we don't reference the Constitution in the Title of our Bill we will be allowing the lawbreakers to not be held accountable for any laws they have broken prior to the date this bill passes. It is so important to hold all of them accountable for the tyranny and abuse they have caused the many many families in this State and Country so they will not continue this behavior.

Thank You
