Subject: HB6690

To whom this may concern,

Inviting Rep. Diana Urban

In regards to HB 6690: "An Act Concerning Court Proceedings and the Protection of Animals"...

It is and will be pure bliss to acknowledge a rep to stand as a voice for the animal in all animal cruelty cases. The percentage of animals given "back" to the abuser is in itself cruelly. This is no pun, and spoken in a manner with the utmost respect. This is the reason for an immense need for HB 6690. The number of cruelty cases is astounding and although we have a long way to go to find the criminals, abusers and humans with intent to cause harm, this is exactly what we need.

An animal needs adequate representation against cruelty. It is that simple.

Oh my, we need this and would too be served well with this bill. Many abusers start out with animals, those without a voice who cannot cry, then move on to humans. This bill therefore is deeper than the respect for our fine creatures nation wide.

In keeping with the topic at hand, please, please help us pass this bill. We ask with tears, our animal populations deserve better.

Thank you graciously for your time
