Dear Judiciary Committee:

This is my my written testimony since I can not be there in person. I am writing to ask that you support human representation for abused animals. As we have seen from many scientific studies there is a connection with animal abuse to human abuse. We need to be proactive in our approach in preventing cruelty to animals and I hope to help make this shift. We have an opportunity to make a difference creating protection for animals that have no voice, creating a society of empathy and compassion for our children as well as adults. You can set the standard for hope to these animals and their care givers as well as create communities that are supportive, humane and caring to animals.

Thank You,
Lynn Printy
