I support house bill 6690 because animal abuse has escalated too far and is injuring not only animals, but spread to the human population. I give as an example the current case of Kyle Berry from Enfield. He has a long record of convictions of violence and animal abuse. He is now on trial for double manslaughter in Hartford Superior court. Had animal abuse laws on the books been enforced to their full extent, Mr. Berry might not be responsible for the death of those two people.

I have been in animal rescue for 15 years, and it pains me to see the terror brought upon our community by these evil people. Stopping animal abuse can only help everyone.
