

2/20/13

We are writing to support Bill No. HB 5299!

As CT citizens, we believe this legislation would mean the world to children who suffer from Epilepsy, a life-threatening disease. These children NEED you to support and pass this bill!!

Please pass legislation to allow non-medical school personnel like teachers, coaches and paraprofessionals (who volunteer and are trained to administer Diastat) to be allowed to administer Diastat to children suffering in the event a nurse is not immediately available

HB 5299 will save lives and protect these children!

Sincerely,

The Shepley family

Westport, CT
