**Subject:** access to vital records

I would like to express my concern about the proposed action that would limit the access to vital records. It is my belief that those records are part our ancestry and actually part our families' legacys. It is now recognized how important it is to know the health concerns of our ancestors. Also it enriches our family history. Who has a better right to that information than the members of one's family ? Thank you for letting me voice my opinion. Sincerely, Rita Dempsey Dieck
