

To Whom It May Concern,

I live in CT and have recently been introduced to the plans for Green Hills Farm & Community - a community especially designed for special needs residents ages 21+. This plan provides a nurturing, caring and supportive multi-faceted community complete with an organic farm that residents can work on, a petting zoo, therapeutic riding program and a cafe and shop where residents can work and people from the surrounding communities can come enjoy. Imagine an integrated living/working community for special needs individuals that serves and interacts with others in a meaningful way. This describes the type of community that many of would hope to retire to and age in, only its for a special segment of our population - deserving and often overlooked people from every region nation-wide - world-wide. We need this in CT. I'm not even the parent of a special needs child, but I get it. I hope you do too. Please vote for Bill 6001.
