

SULLIVAN HB 6519

I live in Manchester CT, and am writing to support GMO labeling bills HB 6519 and HB6527.

I am the mother of two young children, and I want to know exactly what I am feeding them. I would like to ensure that they consume almost no genetically modified food. I want the right to know because although GMOs have never been proven to be unsafe, they also have not been proved to be safe. I would like to make the choice for myself and my family whether or not we consume food that has not been 100% verified as SAFE for my children to eat. Additionally, I know there is a potential link between GMOs and the increase in food sensitivities and allergies. One of my daughters is allergic to peanuts, even though we have no family history of food allergies. The same daughter is also showing signs of a significant food sensitivity to milk products. As a mother, I want to do everything in my power to help my children and future generations make informed decisions. Having the ability to easily identify which foods do and do not contain GMOs will greatly help me to do that.

Thank you for your time,

Nicole Sullivan
