

## Daniels SB374

To whom it may concern:

This email serves to voice my opposition as a parent to HB374, requiring mandatory evaluations for school age children. I feel this is a direct infringement on my and my children's rights and privacy. The bill, at least as it is written, will not serve any valuable purpose for our society. Assessments and evaluations are already available to any/all parents who feel that their child might need them. Certainly the parents are best able to determine if/when their child might need intervention. Perhaps better access to services is needed once they have been deemed necessary, but this bill does not address that issue.

There are many reasons why this bill should be disregarded. Please accept this as testimony from a parent who is not in favor of HB374. Thank you.

Sincerely,  
Lisa Daniels
