

DeFelice SB374

It just came to my attention that this bill will REQUIRE that all homeschooled children be given a behavioral health assessment. This is a MAJOR concern of mine as it strips the parents of even more rights to decide what they feel is best for their child. The Government has been a major disappointment over the years being the cause of what I believe is the decline of our free society that once was. When I was growing up in the 70's and 80's, this sort of thing wouldn't have been dreamed of by free people. I am betting that this is nothing more than drug companies pushing for this to toxify more children with their mental health drugs that cause violence. It is disturbing and disgraceful that our politicians think that this is governing. We don't vote for people to run our lives but rather to protect our rights. Please do just that and vote no to this violation of our rights. Let parents be parents and you can expect better results with our children.
