

## **Wolfe SB 374**

I am writing to oppose this bill. This would be a blatant invasion of privacy without just cause. There is no justification for subjecting all home schooled children and families as well as public school children to this treatment. This is yet another back handed way for the government to pry into the private lives of law abiding citizens who have done nothing wrong.

Another point to consider is the fact that this state is already in serious financial trouble. How will these interrogations be paid for? With more tax payer funding? We simply can not keep coming up with more and more programs to fund and just charge it to the people of Connecticut.

"Please vote against Proposed Bill 374, which would require behavioral health assessments for homeschooled children ages 12, 14, and 17 without any indication that they were needed. These comprehensive, invasive evaluations would constitute an unwarranted invasion of family privacy."

Thank You for your time,  
William Wolfe
