Dear Senator Gerrata, Representative Johnson and members of the Public Health Committee.

I support the bill & the law that will allow homeopathic practitioners, who have passed all the designated certification requirements, to practice homeopathy in Connecticut.

As both a doctor & mother of a family I have professionally & personally had tremendous results from the correct homeopathic treatment issued by homeopathic experts.

From my understanding & personal research, I find it to be one of the safest & most effective modalities for health concerns at this time.

During my years of practice one of the most difficult referrals was to find a qualified homeopath in Ct. who was able to practice. Many, many times I had to send people out of state or they had to go without this compatible & effective treatment.

I completely agree & support allowing nationally board certified classical homeopaths to be able to offer their services in Connecticut.

Thank You In Advance For Your Consideration,

Lisa M. Connors DC. DICCP
