

I am writing in support of **House Bill 5542 AA**
Requiring the Display of House Numbers. As a
volunteer firefighter I can tell you that valuable time is
wasted trying to determine the correct house when
responding to emergency medical calls. The requirement
of house numbers would save not only the responding
firefighter but also the ambulance in finding the location
of the emergency.

I would suggest though that the signs be reflective signs
so that they are visible at all times.
