

Members of the Public Safety and Security Committee,

Hi my name is David Czarnecki and I reside in Southington, CT. I would like to make it known that I do not support any new gun proposals or bills, and we all know through history and several studies done they will not prevent any crimes from being committed and instead will punish law abiding citizens.

For example SB 505. How is it one can die for our country at 18 but they won't be able to legally purchase a long arm until 21 under proposed bill?

Also SB 1076 would infringe the right of legal gun owners by requiring extra permits and registration.

SB 1071 would make it more expensive for those that legally own fire arms and hurt the economy.

HB 6595 is vague and has no exemptions and how would it be enforced.

HB 6251 is unconstitutional for it clearly infringes on our right to bear arms. It would also cost tax payers, including myself, more to track and enforce many of the laws that are proposed.

Therefore I do not support any new proposed laws infringing on our second amendment rights.

Thank you
David Czarnecki
