

My Speech

Thank you for the opportunity to speak before this committee on a matter of great Public need.

Legislation requiring the use of fireproof paint in commercial and residential construction will save lives, reduce property damage, limit the injuries and dangers that fireman face in fighting commercial and residential fires, and bring Conn in line with sister states in embracing new products. Fireproof paint utilized as a primer seals and protects structural steel from oxidizing concrete from peeling and residential materials from exposure all with the benefit of containing fires. Space heaters will still catch on fire, children will play with matches, but houses will no longer have to burn down and people don't have to lose their lives needlessly.
