

We need only imagine the Sandy Hook crime scene photos of the slaughtered children and teachers to know that military style assault weapons and large capacity magazines must be banned. I hope all the legislators who will vote on gun safety bills will actually look at the crime scene photos if they are available to them. As Senator Murphy said, in our hearts we know what to do. I was always proud of being a citizen of Connecticut which I have viewed as a sane and sensible state. After the Sandy Hook massacre, Connecticut should be a leader in gun safety and a leader in pushing back against the against the glamorization and marketing of these appalling death machines.
