

I am a wife, a mother, a daughter, an American, a Patriot and a member of the NRA.

As with the rest of the nation, I was shocked and saddened by the events that occurred in Newtown.

As a citizen of both the State of Connecticut and the United States, I am committed to continuing to promote my constitutional rights, including the right the keep and bear arms. Like most gun owners, I participate in shooting sports, am an outdoor enthusiasts and believe in my right to protect myself and my family by bearing arms in self defense. I am a law abiding, moral and ethical person who would never exercise my rights at the expense of others.

I urge you to dismiss the outrageous tenets expressed in SB 1076. The proposed legislation will not address the real problem which is the woeful lack of mental health, outreach services and support that is needed to correct a majority of the issues confronting us and leading to acts of violence against the innocent and defenseless.

Thank you.
