

To Whom It May Concern...

I continue to be horrified by the daily carnage wrought in the streets, cities and towns of this country, due to the insanely EASY access people have to firearms. NO other civilized democratic nation in the world tolerates this kind of death rate.

We MUST enforce background checks for EVERY gun transaction, regardless whether it is a sale by a dealer, a gun show sale, or simply the passing on of an heirloom from father to son.

We MUST ban the sale of military grade weaponry... the very notion that everyday citizens should have in their possession weapons designed for the theater of war is patently absurd.

We MUST ban the sale of high-capacity magazines... they serve no useful civic purpose, and to permit their sale just because a few people throw temper tantrums that would make a two-year old proud is no reason to justify their continued availability in the marketplace.

Thank you,
