

A guaranteed solution to prevent weapon violence in our schools

After the attacks on 911 The USA wanted to make absolutely sure in fact they wanted to guarantee the American people that no one would EVER get on an air plane EVER again with a dangerous weapon of any kind. They wanted an absolute guarantee that this would NEVER EVER happen again. They knew if they wanted to prevent another tragedy like this from EVER happening again they would have pass more than just another law that would ban anyone from bringing a bomb, gun, or knife on board an airplane so they decided to do something that would be more effective. They wanted to guarantee the American people that this would NEVER EVER happen again EVER!!! . They knew if they wanted an absolute guaranteed solution to STOP anyone from EVER being allowed to bring a dangerous weapon on board an airplane again they would need to prevent any weapon of ANY kind from coming on board in the first place.

Every day Millions maybe Billions of air travelers go thru scanning devices before getting on an airplane. Why did the government decide to scan every single person before getting on an airplane? Why not just pass a law banning dangerous weapons? Because they wanted to guarantee the American people that it was safe to get on an airplane and it was safe to travel again. Today we can all go to the airport get on get on an airplane and fly anywhere we want to without the fear of someone having a dangerous weapon OF ANY KIND. We can do this NOT because we passed a law that would ban weapons on an airplane. We can do this because we have the confidence that everyone has been scanned and checked out for weapons of ANY kind before getting on the plane .I think we can all agree that since 911 and the SECURITY/ SCANNING measures that are in place an airplane and or airport is now probably one of the most safest places in the world to be. Another example of this type of security is in ALL of our State political office buildings, Court houses, Federal buildings, State office buildings, and most Government office buildings.

Why was it so crystal clear to our Leaders what they needed to do to protect these types of facilities? And yet there having such a difficult time trying to figure out how to protect our School Children. Millions / Billions of State and Governmental employees pass thru security and scanning devices every day when entering their work place WHY do they do this ? They do this to ensure and guarantee everyone's safety that is entering the building that's why.

OUR SCHOOLS SHOULD BE AS SAFE AS our Political office buildings, airports, Court house's, State office buildings, and Government office facilities.

If you had to decide, if you had a choice where to send your Child to school would you be more comfortable knowing there was a NEW LAW on the books protecting your child from harm. Or would you be more comfortable sending your child to a school that has prevention security measures at the door like that of our Government run agencies and airports. Knowing that every child every person entering the school has been scanned and screened to prevent ANY kind of weapon from being brought in.

If you want a guarantee that this will NEVER EVER happen again then we must make sure that our schools are as safe as airplanes and our State and Government run facilities are today. Stop the weapons from coming in At any cost....

Absolute guarantee to prevent another WEAPON ANY KIND related tragedy would be bullet proof glass on all ground level classes, Locked and secured perimeter doors with security officers, Security surveillance cameras, Photo ID swipe badges for all students, Sign in procedure and positive ID for anyone entering the School, Proof positive and verification of who the visitor was there to see, PRE Entry scanning area before entering school. Security officer and scanning procedure for anyone entering the School.

If you want to guarantee a tragedy like this will never ever happen again why not follow the same protective security measures that are already in place in our Local, State, and Government buildings. Millions/ Billions of Public, State, Government officials and employees go to work each day and pass thru security and scanning devices to ensure their safety. These people all go to work every day under the protection of a secured building. OUR SCHOOLS, TEACHERS AND SCHOOL CHILDREN DESERVE THE SAME SECURITY as our State local and government run facilities.

Our schools need to have the same protective and security measures as our court houses, airports, State office buildings, political office buildings,
