With all due respect, I believe attempting to subject law abiding citizens to this proposed punitive, restrictive, and I might add, poorly written and conceived legislation is an insult to the great people throughout this state who understand and hold dear are Nations and our State Constitution, the bill of rights and are responsibilities as free citizens.

Banning certain Firearms over what amounts to basically cosmetic differences and ergonomics, or for example: folding and adjustable stocks, Flash hidere, Bayonet lugs , and yes even Magazine Capacity Has been proven to do nothing, and never will, to protect us from people with evil in Their Hearts.

Registration, Liability Insurance, increased permit fees, heavy taxes on Ammunition, how will this save lives?

Incrementally disarming the good people of this Nation and State will not save lives, is against are Nations Constitution, is against are states Constitution and as World history has repeatedly shown is an invitation to disaster.

I stand opposed.

Thank you
