

Please support Governor Malloy's proposed legislation. **We cannot control human behavior but we can limit access to deadly force.** Assault weapons do not belong in the hands of civilians – we need to strengthen CT's current ban on assault weapons. Please support an immediate vote on Malloy's proposal and agree to ban any weapon that has one or more military-style feature and ban magazines with a capacity greater than 10 rounds.

Yes I have cut and paste from a more eloquent friend but the words and position are unassailable.

Hoping you will do what's right representing and protecting the people of our state
